

You have succeeded in scaring the media into a panic that would stop the greatest movie ever made about the greatest generation, Saving Private Ryan. Your over reaction to a half time exposure of a publicity seeking celebrity did nothing but help expose the celebrity in question....your rulings are sounding alot like a Muslim style theocracy...what's next?.....public punishment of women who show their faces???? Where is your common sense...I voted for Mr. Bush but I did not vote for a public institution to censor movies like this. Movies that would show our children what sacrafice for our country is like.....are you trying to re-create the anti-war feeling of the sixties? So the characters talked a little more earthy than you like...our children who are fighting the current war will see and hear much worse. Our fathers and grandfathers were heroes...do you think if they used the "f" word, they would be any less a hero....WAKE UP!
